- ▲ Client Server and Multi-User with concurrent access
- ▲ Barcode Scanners, Customer Display, Multiple Printers (receipt & reports) and Measuring Scale\* supported
- ▲ Can be extended to integrate with our Payroll, Human Resource, SMS or ERP systems

## Advantages

- ⤴ No annual license costs for the software and database. The system belongs to the client after project completion.
- ⤴ This system imposes no limitation on number of users, number of machines or data captured
- ⤴ This system is not a one-size-fits all. It is modified to fit each individual client's requirements during implementation.
- ⤴ JumboPOS is stable and is in active development with regular release of upgrades.
